

Nimble Fox v0.9.2

AI assistant for the Unity editor

Thank you for downloading Nimble Fox! Please note that this tool is still in development. We are actively adding features to Nimble Fox and making it more intelligent.

We want to hear your feature requests and feedback. Come chat with us and show off your games on the [Discord](#) channel!

To start creating, create an account at <https://nimblefox.ai/>.

— *Nimble Fox Team* —

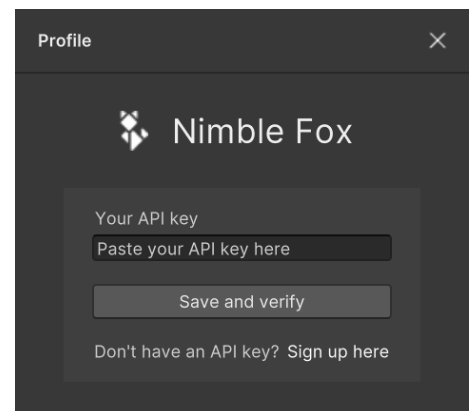

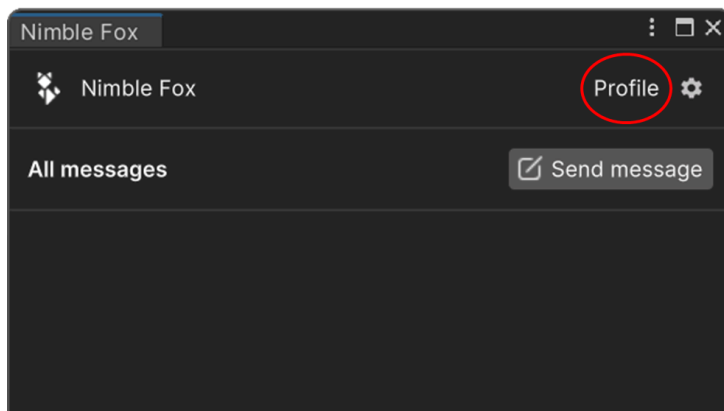

Introduction

- Open Nimble Fox by pressing **Ctrl+T** or through **Window > Nimble Fox**.
- Everything Nimble Fox creates is stored in your scene and **Nimble Fox > Generated Content** folder.
- For tips on prompting, watch the [prompting tips video \(1:25\)](#).
- Write short and focused prompts, and develop your game feature by feature.

Getting started

Watch the [setup tutorial \(0:53\)](#) or follow the steps below:

1. Create an account at <https://nimblefox.ai/> and generate an API key.
2. In Unity, open Nimble Fox and verify your API key in the profile view.

Support

You can find Frequently Asked Questions [here](#). Contact us on [Discord](#) or by email at <https://nimblefox.ai/contact>.
